

Nebi the Snake ~ Hebi

With over 3,000 species of snakes, Nebi is possibly the rarest and most mesmerizing of them all.

He can shift from a smile to full fangs and venom in milliseconds. Soft and silent, quick, and capable of raising his hood so swiftly that you cannot see it; however, Nebi is a valued sidekick to Navi in many areas.

Nebi can control the amount of venom he uses.

He can be a one-inch snake and instantly transform into a 50-foot-long, dangerous, and aggressive snake, more significant than Anaconda and Python's known world record sizes.
