

Ryton the Shark ~ Same.

Ryton is an exceptionally rare shark, one of over 400 species found in Earth's waters; he is so rare that no humans have seen him in modern times, a blend of a Great White Shark and a Greenland Shark.

Ryton rarely contributes; he simply does what is necessary and lives as a loner, never failing in any task; he is also one of the council's finest assassins when required.

There is no water in the universe that he cannot swim in. He, too, can morph into any other form of fish or aquatic mammal.
