

Saso the Scorpion ~ Sasori

Saso, a scorpion, is the deadliest of the 23 families of scorpion species; however, there are over 2,700 species in total.

Some perceive him as small, but he is a strong and direct member of Kami. If he were to release his venom, it could kill half of Kami. However, due to Kami's laws, this scenario could never occur.

Saso can master all the species within his family and control his venom to any level he desires. This ability serves Saso well and is an excellent enhancement to his weaponry. As for his claws, we shall explore that later!
