

## Sugon the Plane ~ Hikoki

Sugon is a plane—well, not just a plane; he represents multiple aircraft that can adapt to all known types; he can also introduce his version mixing when he feels it is needed. Whether it's a transport plane or the latest stealth fighter, he can change and adjust in milliseconds.

Modern technology is advancing rapidly, rendering him invisible to the naked eye and radar. Given his ability to travel at twice the speed of sound without creating a sonic boom, there is virtually no chance of detecting him.

He, too, can fit into a one-inch gap to observe or attack.
